

CamSoft's Control Mate

\$395

Control Mate is an inexpensive alternative to our Hand Held Pendant. This is a complete machine tool controller for any type of machine control application. The concept is to provide a system with Control Mate as the main control. Control Mate is our low cost, light weight 4 oz. hand held pendant with 25 user programmable membrane switch button states. We hold the cost down by only using digital on/off buttons. The cable is included. Custom cable lengths are made to order and each button can be customized to do what you want it to do.
